SUSTAINABILITY AND PROSPERITY

WHO ARE WE

We dream of a better future and try to manifest it. Our dream is devoid of inequality, injustice, and malnutrition. Our aim is to make worldwide sustainability and prosperity accessible to everyone. With our innovative use of blockchain technology, we want to give every individual a place in the new world economy, one that is more local, less hectic and happier overall.

Our Solution

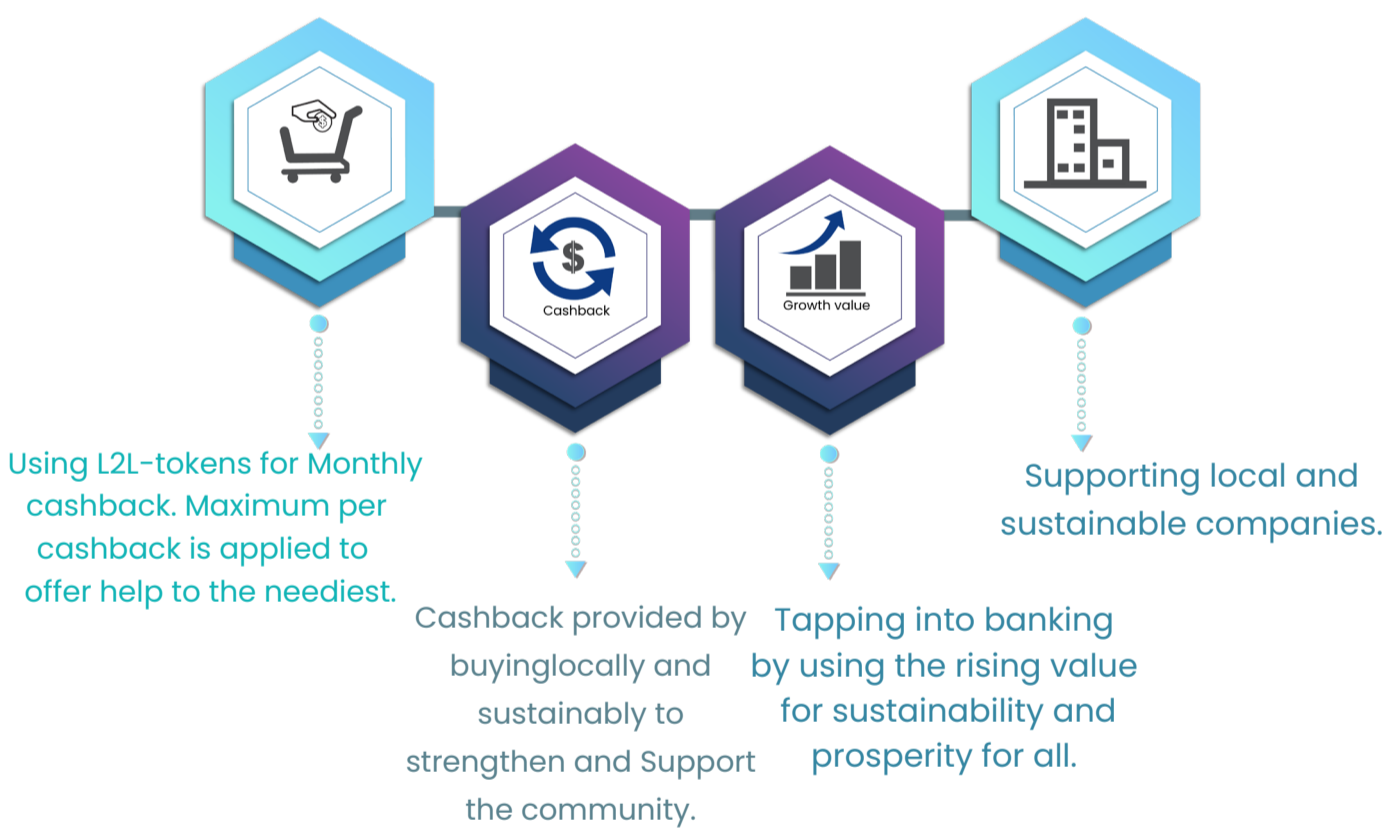

2local is an innovative blockchain-powered platform that encourages sustainability and prosperity for everyone. It provides a smart marketplace for consumers to connect with companies that locally produce sustainable goods and services.

2local rewards people who buy at connected companies twice:

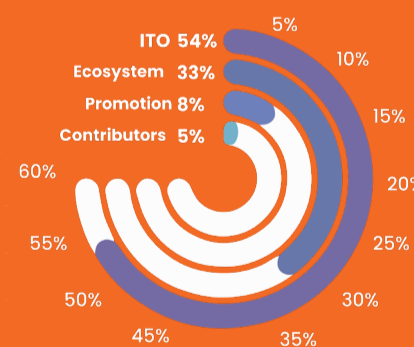

- By offering a cashback in L2L-tokens.
- By creating a cryptosystem that makes the value of L2L-tokens exponentially rise with more users.
